

DESCRIPTION

1, Power supply : Used 3.7V lithium battery, or used car power.

IC U1 is a power ic , make 12V to 5V . IC U2 is Battery Charge Management.

2, U6, C24, C25, C26 compose the Audio Amplifier.

3, U3, Y1(12MHz), U14 compose the Bluetooth Module circuit(2.4GHz).

4, U17 , U18, L8, C86 compose the Operational Amplifier, Differential to single-ended.

5, U15 is MCU and Y3(16MHz) Control the whole system.
